

Gallery Block

Overview

Gallery Block allows you to display a set of images using pre-set templates.

The Gallery Block displays the contents of an image folder. The layout of the images can be defined using templates.

Gallery Block configuration window with a folder selected

Choosing images to display

You can select images to display in the Universal Discovery Widget.

You need to select a folder with images, not a single image, for the Gallery Block to work.

Tip
When you select an image folder, the information about the folder will be shown in this

window.
